Flowchart on the instructions of a process related to your work GA5-240202501-AA1-EV01
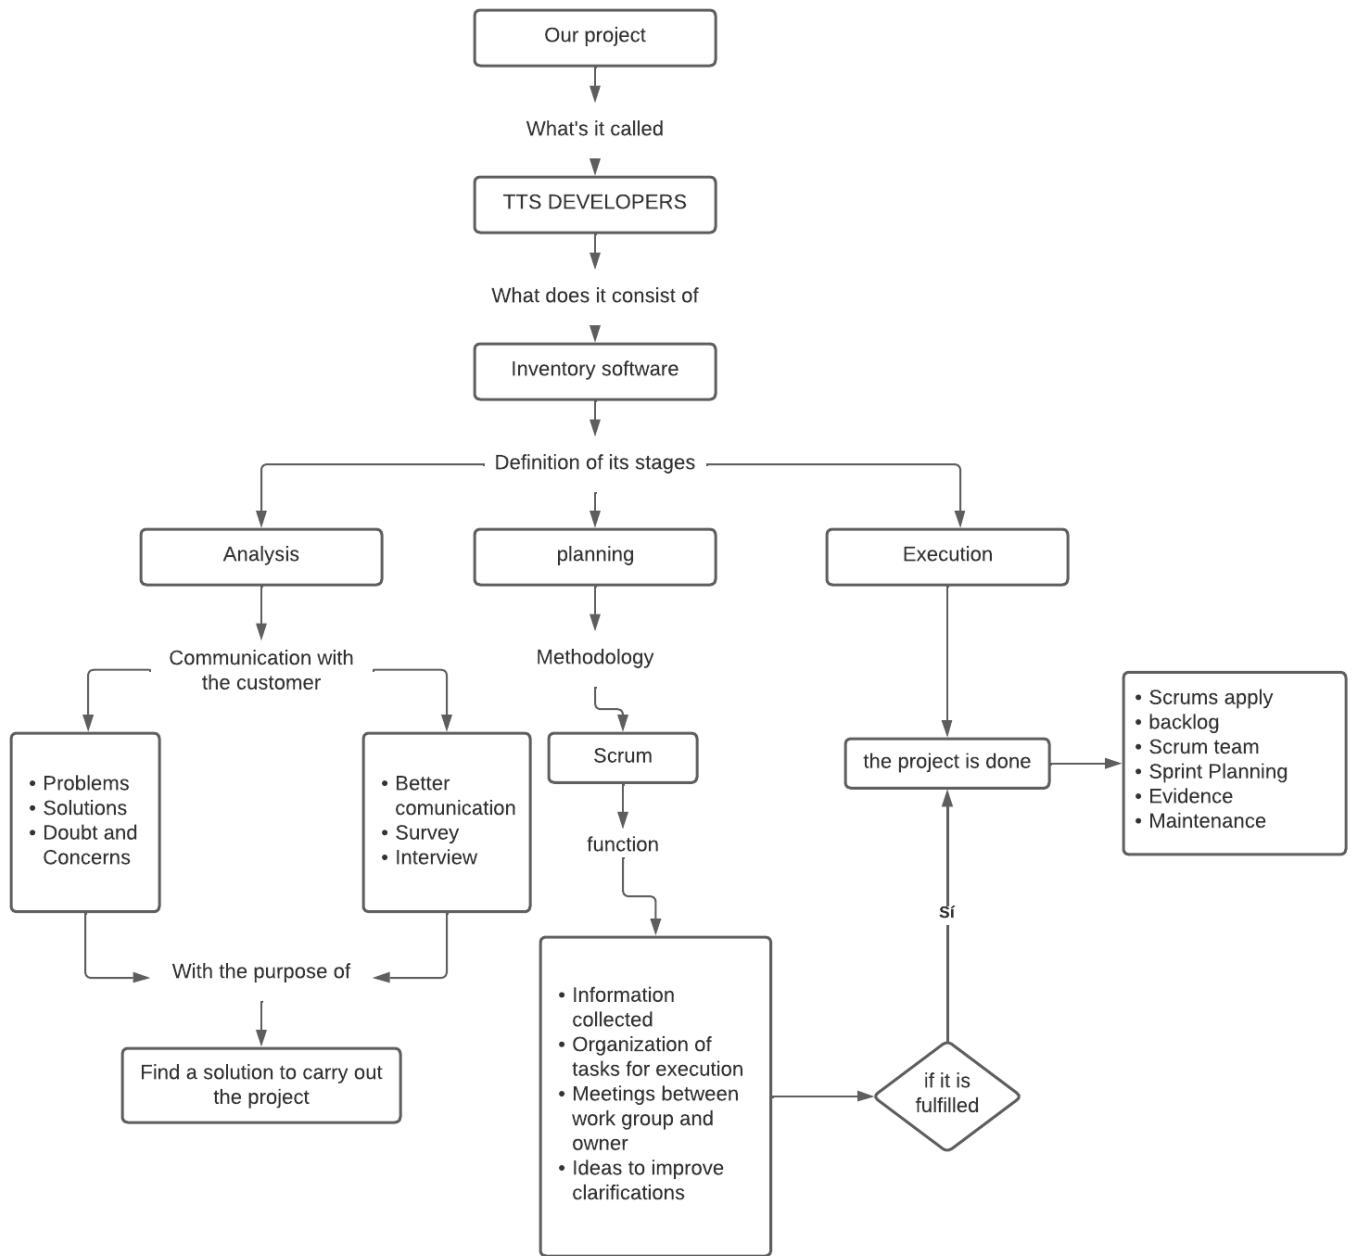

Ana Carolina Polo

Tecnologo en analisis y desarrollo de software

2023

Introduction

In this activity, a flowchart will be made where the step by step for the creation of the project will be presented, complying with the standards and requirements of our clients to meet their needs.

Our project

What's it called

TTS DEVELOPERS

What does it consist of

Inventory software

Definition of its stages

Analysis

planning

Execution

Communication with
the customer

Methodology

Scrum

the project is done

- Scrums apply
- backlog
- Scrum team
- Sprint Planning
- Evidence
- Maintenance

- Problems
- Solutions
- Doubt and
  Concerns

- Better
  comunication
- Survey
- Interview

function

Sí

With the purpose of

Find a solution to carry out
the project

- Information
  collected
- Organization of
  tasks for execution
- Meetings between
  work group and
  owner
- Ideas to improve
  clarifications

if it is
fulfilled

CONCLUSION

It is possible to understand how the creation of the project will be and how it was followed up to achieve compliance and schedule the execution of the project. It is also effectively understood that each point is important to have a good development.
